We are seeking to appoint a full time B6 Radiographer with a specialist interest in paediatric radiography, to join our team at Newcastle Hospitals based at the Royal Victoria Infirmary.

The Newcastle Hospitals Radiology Directorate supports the Great North Children's Hospital – one of only 14 major children's medical centres in the UK. Our RVI Radiology department reflects this commitment to children's health services in terms of Radiographer and Radiologist staffing as well as a child-friendly environment, equipment and general approach to this specialised imaging service.

As well as ensuring the highest standards of patient care to our outpatient and in-patient services in Newcastle, we provide specialist treatment for children across the North East region and beyond.

The Radiology team provides a quality diagnostic service to clinicians and patients in a variety of settings and uses high specification diagnostic equipment provided by leading vendors.

We have recently installed a high-spec fluoroscopy suite within our Paediatric section. The Department has also installed a Siemens Force CT scanner – one of only two in the country.

The successful candidate will ideally have some experience in all aspects of Radiography – Plain Film/Fluoroscopy, CT/MRI, with a particular interest in working with Radiology colleagues to build and develop the paediatric imaging service at RVI. It is anticipated that opportunities to work across these modalities will continue.

The successful candidate will also have opportunities for involvement in a paediatric focussed clinical and teaching role as well as continuing professional development both at the RVI and Freeman Hospital.

For further information please contact Brian Hobson, Superintendent Radiographer, on 0191 2826673. Alternatively, you can email Brian.Hobson@nuth.nhs.uk.
