

Give us a hand. Help us to help you.

The radiographers you are going to see today have your care, safety and comfort at the centre of everything that they do.

Their job is to get the best possible diagnostic image.

That means they will need your help and co-operation.

If you have a disability or injury that makes it difficult or uncomfortable for you to move in a certain way, please let the radiographer and other staff know.

Please help us to help you.

Thank you for your assistance.
