

X-ray Results

The examinations carried out in the radiology department are checked for quality and then a report is sent to the person who arranged the x-ray.

Our aim is to report all examinations within 2 weeks however some examinations may take longer.

If you had your examination arranged by your GP practice you will receive your results from your own doctor. The radiographer performing your examination will inform you of when your results will be available.

X-ray results from a clinic or day hospital will go to the hospital doctor and not to your GP. The clinic or hospital doctor will let you know when you will get the result of this examination.

Sometimes a further test or a specialist clinic appointment is required following your x-ray. If this is the case we will send an appointment by post or your GP/hospital doctor may contact you.

If you have any queries regarding your results please contact the Radiology department between 9am-5pm (01896 826417).
