## Simulator Prescribed Treatment

## Have you "Paused & Checked"?

A radiotherapy IR(ME)R checklist for Operators about to patient Treat a

	Most re	eported deliv	very errors happen on non-computer planned treatment pathways
000	Р	Patient	Confirm prescription is authorised Confirm patient consent Confirm patient ID (3-point check) Confirm pregnancy status checked & recorded Confirm if analgesia required
	A	Anatomy	Confirm Body site with <b>patient</b> Confirm <b>laterality</b> with patient Is this a previously treated volume?
	U	User Checks	What is unusual /non - standard about this set up? Simple or complex prescription
	S	System & Settings	Identify current & previous tattoos
			Check FSD
	E	Exposure	IF NOT SURE <b>STOP!</b>
			IF NOT SURE STOP! Treat, watching patient at all times
	D	Dose	Complete treatment documentation

IR(ME)R requires all duty holders to comply with their local Employers procedures.

This "pause and check" poster does not replace these procedures but represents a shortened summary of the main checks.

You must adhere to your local procedures at all times.
