

# Medical Imaging Technologists

Are you looking for new experiences and opportunities? Now is the time to think about your next move. We have opportunities for both those with experience or those who are recently graduated. We also have opportunities available for Sonographers.

Upskill quickly, get loads of interesting cases to work on, and do it in a friendly and affordable little city. Welcome to Southland Hospital.

You'll be based in general x-ray, with a general workload including paediatrics, geriatrics, emergency, theatre, trauma, mobiles, NICU, ICU and ward work. Opportunities are available for those with skills in the modalities - CT, MRI, nuclear medicine. However if you don't have skills in these areas yet, training opportunities regularly become available.

There's a great blend of working in a team and solo - mostly you'll be with your friendly, supportive team, but because we run a 24/7 roster, there'll be times when you have to work independently on out-of-hours shifts.

Southland Hospital is a modern hospital with a busy Radiology department giving you interesting work across a range of specialties, but keeping it's small hospital feel and collegiality. It is a really friendly, supportive community.

Along with your qualifications in medical imaging you will hold a New Zealand Medical Radiation Technologists Board APC (or are capable of gaining one).

You'll love the work, and you'll love the New Zealand lifestyle. There's heaps on offer here - with a busy, varied role with an awesome team, and an exciting life outside work, it doesn't get much better.

**We only accept online applications.**
