# Catheter Labs Educational Open Day

## Thursday, 3rd October 2019, 9am – 4.30pm

**Seminar Room Level 7 | Bristol Heart Institute**  
**Marlborough Street | BS2 8HW**

We are inviting nurses, physiologists and radiographers to take part in our Educational Open Day at our Catheter Labs.

University Hospitals Bristol NHS Foundation Trust is a dynamic and thriving group of hospitals in the heart of Bristol – a vibrant and culturally diverse city. The Catheter Labs are situated within the Bristol Heart Institute (BHI); a busy cardiac centre performing over 6,000 adult procedures each year, which offers state-of-the-art equipment combined with an excellent working environment. There are currently four Cardiac Labs, plus a hybrid theatre lab within the BHI. UH Bristol is undergoing an exciting development with an expanding TAVI service, as well as the construction of a new fifth Catheter Lab.

On the day, we will be going through TAVI implants, angioplasty and electrophysiology demonstrations, advanced imaging OCT and OFDI, as well as a tour through our labs and a chance to interact with fellow colleagues.

The centre is heavily involved with research and is at the cutting edge of technological development. Visit us at our Educational Open Day to get a real feel for what life is like at the hospital.
