Thinking

There has never been a better time to join us

Come and see what's new at Peterborough, Hinchingbrooke, Stamford and Fenland Hospitals. A lot has changed since these sites merged in 2017.

New team structure

Our team has been structured in a way that means staff are supported no matter the grade or the situation. We work positively together to improve and develop services and individuals.

Career development

No matter what band you are we are interested in you and where you see your career going. We have a preceptorship program (*Annex T*) and promote staff development, e.g. reporting (*plain film and CT Colons*), Ultrasound and Nuclear Medicine. These are just some of the areas where you can specialise. There are internal courses and mentoring to develop your leadership

skills should this be where you see your career progressing.

Better home/work life balance

We support a home and work life balance to ensure staff can develop a successful career whilst managing lives as parents and carers. Talk to us about your needs.

Returning to practice

We support Radiographers who want to return to practice

Expanding services and enhancing patient pathways

We are looking to provide additional support throughout the 24 hour period. Evening and night shifts are therefore available. We require staff that can work independently. If you

have CT experience that is a bonus. The pattern of hours is negotiable.

Please come and talk to us about the possibilities

For more information please call one of our leadership team.
